and

Community Engagement and Family Engagement

## Family Engagement and Community Engagement

Family engagement is a high leverage strategy that supports student learning and is designed to reduce or eliminate institutional barriers for families of color to advocate for the needs of

advocacy and encouragement with positive student achievement and outcomes.

Partnerships:

## Community-Based Organizations

learning of students outside of school hours. This includes after school programming and enrichment activities. Enrichment activities provide opportunities for students to pursue learning in their own areas of interest and strengths. Research has shown that students engaged in these activities can lead to increased academic performance and attendance.
