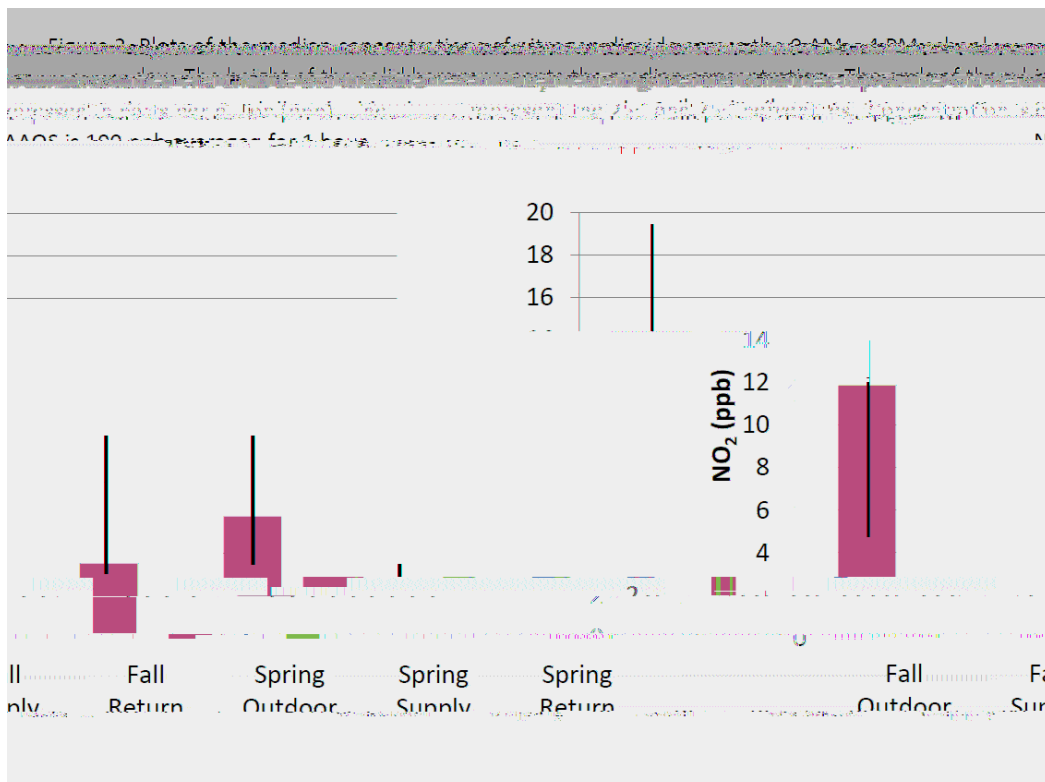

Figure 3. Plots of the median concentrations of PM₁₀ across the 9 AM – 4 PM school day. The

Figure 7: Plot of the reduction concentrations of Ultrafine Particles over the 0.4M and 1.0M ash as a function of the reactor. The height of the solid bars represents the concentration of the particles in the reactor and the dashed bars represent the concentration of the particles in the feed.

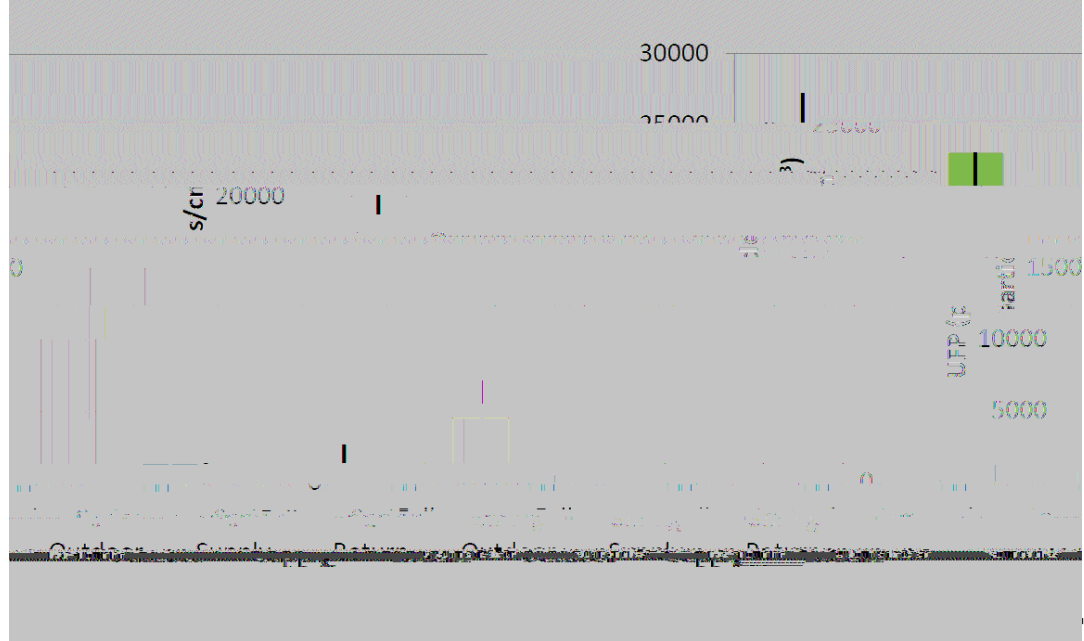

Figure 8: Plot of the reduction concentrations of Ultrafine Particles over the 0.4M and 1.0M ash as a function of the reactor. The height of the solid bars represents the concentration of the particles in the reactor and the dashed bars represent the concentration of the particles in the feed.

Figure 11. Plots of the median concentrations of the VOC ethylbenzene in outdoor, supply, and return air locations of the HVAC system during Spring 2019. The height of the solid bars represents the 25th percentile and the dashed lines represent the 75th percentile. Concentration is expressed in micrograms per cubic meter ($\mu\text{g}/\text{m}^3$).
