perspectives. Course explores trigonometric functions algebraically, numerically, symbolically, and graphically. Content will be explored with and without the use of a graphing calculator.	
Explores relations and functions graphically, numerically, symbolically, and verbally. Examines exponential, logarithmic, polynomial, and rational functions. Investigates applications from a variety of perspectives. Course explores trigonometric functions algebraically, numerically, symbolically, and graphically. Content will be explored with and without the use of a graphing calculator.	
The following standards will be explored in the course: All math practices standards.	

I will cultivate culturally sustaining relationships with students by: Having students check in privately and individually through a Desmos check in every day.	
Families can communicate what they know of their student's needs with me in the following ways: E-mail and parent teacher conferences.	
I will celebrate student successes in the following ways: good grades.	

I will solicit student feedback on my pedagogy, policies and practices by:	
Individual meetings and class surveys.	
When class agreements aren't maintained (i.e. behavior) by a student I will approach it in the following ways:	
Individual meetings and, as necessary, class meetings to determine if agreements should be changed.	
I will provided opportunities for students to choose to share	
and showcase their work by:	
Group investigations and tests. Students will collaborate on everything except individual assessments.	

Students will wear masks at all times and windows will be kept open to the extent possible.

I understand the importance of students taking care of their needs. Please use the following guidelines when coming and going from class: Keepting students in the class during the first and last 10 minutes of class.

I will collect work from students in the following way: Daily quizzes will be collected and returned with feedback.

If a student misses a deadline, I will partner with the student in the following ways so they have the ability to demonstrate their abilities: Students can retake tests at any time during the semester during tutorial.

My plan to return student work is the following:

Directions on how to format submitted work (ex. formal papers, lab reports, etc) can be found here: All steps shown.

If a student is absent, I can help them get caught up by: Use of Canvas with on-line material.

I will provided the following materials to students: Text book and investigations. Please have the following materials for this course: Textbook, spiral notebook, folder, pencil. E BOILING OF ALL TO THE

Students & Families can go to the following location for up-to-date information about their grades throughout the semester: Synergy/ParentVue

I will update student grades at the following frequency: After each unit test or test retake.

I will communicate the following marks on a progress report:

The following system is used to determine a student's grade at the end of the semester: 100% test, including the final exam.

I use this system for 2us
