

IDENTIFY PLACES THAT THE COMMUNITY VALUES

General location of comment

Each grade had a hallway - decorated periodically for homecoming, etc. with themes. This served as a back-up space to eat lunch and convene with others, hangout with friends between classes and at lunch.

Hallway for each grade

The hallways where the lockers jut out into the hall: seniors were 1st floor, juniors were 2nd floor, freshmen were 3rd floor, and sophomores were in the music wing where the choir and band were. Sophomore hall definitely was the worst & smaller, cramped, less amazing space for decorating, fewer lockers so sophomores are more dispersed. I'd be interested if this still happens and whether current teachers and students see the utilization of these hallway spaces as meaningful. This is the place (usually hung out with friends between class and at lunch. We would just sit on the floor, but it could also be cool to have actual seating options and collaboration spaces in the hallway, maybe++
